

# JeraSoft Billing 3.6.1

## On this page

- [General changes](#)
  - [Interface](#)
- [Various small changes](#)

JeraSoft is pleased to announce the release of VCS 3.6.1, which had some additions and improvements. This document will describe the features with most impact on system's functions and also provide information regarding their usage.

## General changes

### Interface

- To simplify the process of **importing rates** for Jurisdictional billing module, on the second step of rates importing process, the "*Rate Group*" field was added, which allows you to specify a group where imported rates belong;
- For additional convenience, exchange rates fractional part was increased up to 8 symbols after comma.

## Various small changes

1. Now it's possible to add two or more accounts with disabled both ORIG and TERM checkboxes.
2. From now on, all newly added account names are **unique**, for avoiding duplicates in accounts list.
3. Inability to select termination account in *Terminator/Policy* field, even if its parent client has no preselected *Rate table* in *Terminator Settings* was fixed. Now it is possible.
